

2008 INVASIVE PLANTS MANAGEMENT PLANS

The Little St. Germain Lake District website has been updated with maps depicting the proposed 2008 spring chemical treatment sites for populations of both Curly-leaf pondweed and Eurasian watermilfoil. The maps can be found at http://www.littlesaint.org/invasive_species_management_page.html

As is required by WDNR Administrative Rule NR107 (available at http://www.vilaslandandwater.org/ais_misc_documents/nr_107.pdf), all waterfront property owners within 150 feet of treatment sites will be notified via a letter of the details of the proposed chemical applications.

Ted Ritter, President
Board of Commissioners
Little St. Germain Lake Protection & Rehabilitation District
